

The <head> tag is a container for metadata about an HTML document. Metadata is data (information) about data. <head> tags always go inside the <html> element, and are typically used to specify character set, page description, keywords, author of the document, and viewport settings. Metadata will not be displayed on the page, but is machine parsable.

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
  <title>Antonio Profile</title>
```

```
</head>
```

```
<body>
```

```
  <div class="main-container">
```

```
    <div class="aside">
```

```
      <div class="logo">
```

```
        <a href="#"><span>A</span>ntonio</a>
```

```
      </div>
```

```
    <div class="nav-toggler">
```

```
      <span></span>
```

```
    </div>
```

```
    <ul class="nav">
```

```
      <li><a href="#home" class="active"><i class="fa fa-home"></i>Home</a></li>
```

```
      <li><a href="#about"><i class="fa fa-user"></i>About</a></li>
```

```
<li><a href="#portfolio"><i class="fa fa-briefcase"></i>Portfolio</a></li>
```

```
<li><a href="#contact"><i class="fa fa-comment"></i>Contact</a></li>
```

```
</ul>
```

```
</div>
```

```
</body>
```

```
</html>
```
